Subject: **NJAW - Request to preform night time work in Harrison Street**

Dear Mr. Brushi,

New Jersey American Water (NJAW) has been working to install a new water main in Horner Lane that is required to be connected to the water main in Harrison Street.

NJAW is requesting that they be allowed to accomplish this work over up to two (2) evenings working from 8pm to 6am each night. A night time closure is recommended by the Police Department in consideration of the large volume of traffic that uses Harrison Street during day time hours.

The water company would like to complete this work on Wednesday, September 25th and Thursday, September 26th, weather permitting. In the event of inclement weather the work would shift to the following day, Monday through Friday.

Consideration of this matter by the Princeton Council at their meeting on September 23rd would be appreciated.

If this request is approved, residents in the area will be notified of the scheduled night time work by NJAW.

Please contact me if you have any questions.

Robert V. Kiser, P.E.
