SUBJ: Resolution to award contract

As part of our ongoing network infrastructure upgrade, we are starting to virtualize our server environment. This will require software, which can be purchased under NJ State Contract (#77560) from SHI. The cost of the software is \$11,672.86.

This is a three part process, the servers being the first piece, we will need software to run the virtual environment, and lastly we will have to purchase two Cisco Managed switches to carry the higher bandwidth of the virtual environment. These will be three separate resolutions.

We have a number of servers that are nearing end of life, due to the various reasons such as warranty expiration, or operating system end of life. This virtualization will save the town money, since we are reducing the number of physical servers.

I will be happy to answer any questions you may have.
