SUBJ: Resolution to award contract

As part of our ongoing network infrastructure upgrade, we are starting to virtualize our server environment. This will require us to upgrade two of our managed switches to handle the bandwidth of the virtual servers previously approved by Council. These can be purchased through SHI, under the HCESC TEC-06 contract. The cost of these two switches is \$15,906.88.

We have a number of servers that are nearing end of life, due to the various reasons such as warranty expiration, or operating system end of life. This virtualization will save the town money, since we are reducing the number of physical servers.

I will be happy to answer any questions you may have.
