

NJAW - Authorization to perform night time work in Route 206

We received notice that NJDOT will start overlay activities on April 7th or so on RT 206 between RT 27 Nassau ST and Mountain Ave.

NJAW has a new 8" wet tap and 30' of pipe to install in order to connect the water main into the new Stanworth project. As we do not want to impact the DOT overlay schedule the DOT wants the wet tap and connection installed within the next two weeks.

The DOT has stipulated this work be completed between 8:00 PM and 6:00 AM We anticipate two nights to complete the wet tap and pipe work as the existing water main is the middle of RT 206.

NJAW will notify the residents in proximity to the work area as we get closer to a firm date as we must have two nights of fair weather and have paving materials available.
