To Our Neighbors in Princeton

As part of our company's effort to provide high quality drinking water and improve service to our customers, New Jersey American Water will be installing new water services along Valley Road running from North Harrison St to Walnut Lane. The new water services are being installed to the immediate area homes and business along the route of the new water main. All homes will receive a meter pit behind the sidewalk.

Starting on or about Friday 5-13-2016, CRJ Excavating, a contractor working for New Jersey American Water will be working between the hours of 7:00 AM to 4:00 PM. Traffic control will be coordinated by the Princeton Police Department. All roads will be open at the end of the work day with emergency access provided at all times.

You may experience brief periods of water service interruption while the contractor CRJ replaces the water service to your home. All customers will be given prior notice to any service disruption. New Jersey American Water will do everything possible to ensure a minimum of inconvenience while the new water main is being installed.

If you have any questions regarding this matter please contact Mr. John Thomas, NJAW Construction Inspector, at (908)380-7367

Sincerely,
New Jersey American Water Company
