To Our Neighbors in Princeton:

As part of our company's effort provide high quality drinking water and improve service to our customers, New Jersey American Water will be replacing 2,100' of 6" cast iron water main with 2,100' of new 8" Ductile Iron water main along Valley Road between Walnut lane and North Harrison Street in the Municipality Of Princeton. This new water main is being installed to improve service reliability, water quality, and increase fire flows to the area.

Weather permitting starting on Wednesday Evening April 20, and April 21, 2016, CRJ Contracting Co. Inc. a contractor working for New Jersey American Water will be working between the hours of 9:00 PM to 6:00 AM installing the new water main in the vicinity of the North Harrison St. and Valley Road intersection by the entrance to Princeton Shopping Center. We anticipate this work will take two nights to complete. Once the crossing of North Harrison St. is complete the crews will be working along Valley Road from 7:00 AM to 4:00 PM Monday thru Friday. We anticipate 4 to 5 weeks to complete the remainder of the work. Traffic control will be coordinated through the Princeton Police Department. Local road closures during construction may be in effect. All roads will be open at the end of the work shift with emergency access provided at all times. As part of this upgrade all water meters will be relocated from inside your home or business to a meter pit that is located in the right of way area along the street or curb line.

You may experience brief periods of service interruption while the work is being performed. All customers will be given prior notice to any service disruption. New Jersey American Water will do everything possible to ensure a minimum of inconvenience while the new water main is being installed.

If you have any questions regarding this matter please contact Mr. John Thomas Construction Inspector at 908 431-3217 or (908) 308-7367.

Sincerely,
New Jersey American Water
