

# If the electricity charge on your PSE&G bill is higher than expected, there are two possible reasons.

## 1. Your usage might be higher than usual.

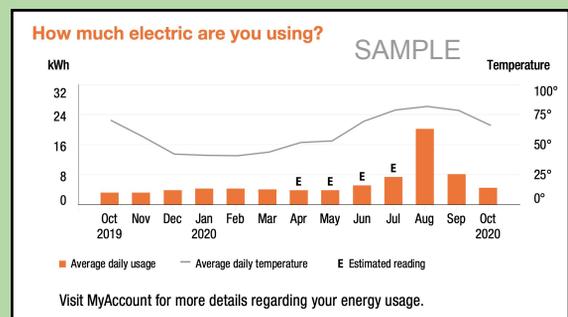

Now that many of us are staying home more due to the pandemic, electricity usage for many of us has been higher than usage in the past.

Page 1 of your PSE&G bill shows a comparison of your electricity usage for the current month compared to the same month last year.

## 2. Electricity billing is catching up with actual usage.

Due to the pandemic, meter readers weren't allowed near or inside your home to register precise electricity usage. During this time, PSE&G used past usage to estimate what you owe. Now that workers can go back to reading meters, electricity bills are adjusted to reflect the actual electricity used. If PSE&G underestimated your usage, you may see a higher bill than expected.

The electricity section of your bill shows which months your usage may have been estimated.

**Both of the above reasons for a higher than expected electricity bill would be applicable regardless of the supplier (e.g., PSE&G, Constellation, or another third party).**

## Additional Information About Your Bill

**PSE&G's rates fluctuate.** PSE&G applies a monthly adjustment factor to its published electricity supply rate. This [reconciliation factor](#) can be a credit or a surcharge. There may be months when the PSE&G price-to-compare on the bill is lower than the fixed-rate that Princeton has contracted with Constellation for the Princeton Community Renewable Energy (PCRE) program. On average, there will be modest savings through Constellation over the contract term (which ends in December 2021) based upon PSE&G's average tariff prices and past reconciliation factors. Since this is an average, a few months could show a slightly higher price. If you opted-up for the 100% Renewable Energy product, you will likely pay more over the contract term.

### Price to compare SAMPLE

You are currently buying your electricity from another supplier. If you had been purchasing your electric supply from PSE&G, your cost would be \$31.15 (or an average of 0.130882350 per kWh). This is your *price to compare*. It varies from month to month depending on your usage.

**Your PoD ID is: PE000008216580479375** – Your PoD ID is your Point of Delivery identification within PSE&G's system.

The Price to compare section of your PSE&G bill looks like the above sample

If you have any questions about your bill, email [PCRE-info@gabelassociates.com](mailto:PCRE-info@gabelassociates.com). You can **opt-out of the PCRE program at any time without penalty**, by calling Constellation NewEnergy, Inc. at 1-833-961-0753 or emailing [PCRE-info@gabelassociates.com](mailto:PCRE-info@gabelassociates.com).
